

# SHIELD

The Shield Laminator is fantastic for anyone in the car wrapping industry. This machine comes with a built-in compressor allowing users to achieve the exact required pressure for the car wrapping warranties. Don't guess, make sure you know exactly the amount of pressure you're applying with a pneumatic laminator.

- **Plug & Play** The Shield laminators are equipped with an internal compressor. It's enough to plug it, let the machine reach its temperature and start working.
- **Eco-friendly** The air pressure system implies lower power consumption than the electric motors.
- **Self-adaptive** the air pressure system with independent pistons adapts automatically to different thicknesses and to different materials often not completely flat. The rollers simply adapt to the media surface in real time.
- **Flexible** it is possible to pre-define the pressure to be applied to each media. Once you have placed the material it is always possible to adjust the pressure.

## Technical Specifications:

Product Code & Model Name:	<b>SHIELD</b> - Heat Assist Laminator
Top Roll Heat Assist:	Up to 50°C
Laminating Speed:	Variable Speed (up to 4m/min)
Maximum Laminating Width:	1650mm
Maximum Mounting Thickness:	Opens up to 30mm

Assembled Dimensions (mm): 2200(L) x 780(W) x 1500(H)

### Warranty

12 Months Parts Only

Standard 10amp power  
AC 230v-50Hz/110v-60Hz

## Optional Extras

- Stop roll drop access
- Feet kit access
- Re-winder kit access
- Front roll kit access
- Back roll kit access
- Film stretcher roll kit access
- Guide sheet access
- Vertical cut kit access
- Roll holder with clutch access
- Kit resistor
